

Innovate UK

Technology Strategy Board

Secure cloud services without pervasive monitoring

In the future, people will not like to accept that large companies know the intimate details of their lives.

A home-based device!

E2e email encryption, secure cloud storage, password manager, cookies separator.

User friendly solution --- no geeky knowledge needed.

A few patents

We are designing, implementing, and testing some of the services.

Marketing!!!

How to sell in a large scale?!!
